

Data Sheet 5.62-6/1¹⁾

Software Module for Measurement on HV Switches for HiRES Advanced, Type HiRES Advanced STL

Application

The software package HiRES Advanced STL is a software extension module to be used together with the HiRES Advanced main software module. It provides automated analysis routines according to IEC 60060-1:2010 for tests of high current and high voltage switches.

Main features

- Additional functions for evaluation of measured data
- Adapted settings for display functions

HiRES Advanced STL requires either one of HiRES Advanced AutoFlow or HiRES Advanced CustomEdit to be installed.
